Sonix, Inc. (<http://www.sonix.com/>) is a leading manufacturer of non-destructive test equipment for the semiconductor industry. Our products include sophisticated software for control of inspection equipment, imaging, defect analysis and more. We have an exciting opportunity for an Electro Mechanical Assembler. The successful candidate will be a motivated, hands-on, self-starter able to switch gears as needed and as deadlines change. Able to work independently and will be required to perform a variety of mechanical assembly and wiring tasks on varying types of Production Products and Prototypes. Candidates must be familiar with assembly hand tools, machine shop tooling, wiring tools, and mechanical measurement equipment. Candidates must be able to read mechanical drawings and wiring schematics and demonstrate their qualifications and have verifiable achievements.

Duties:

The main focus will be to perform a variety of mechanical assembly and wiring tasks on varying types of Production Products and Prototypes. Lean manufacturing environment requires organization and ability to think ahead for advance inventory ordering. Install completed subassembly on Production Product to meet customer's need date, with the ability to troubleshoot subassembly if not operating properly after install.

Required:

- 5+ years experience with electro mechanical assembly
- Experience in lean manufacturing
- Excellent written and oral communication skills and interpersonal skills
